Introduction

This Event Bible includes important information that is for the safety and benefit of all Salt To Saint Relay participants. It is the responsibility of every Rider and Crew Member to read these rules carefully.

We can in no way foresee all potential situations or problems and thus cannot guarantee the absence of accidents. However, with the help of all participants, volunteers, involved city and state agencies, we are confident the Salt To Saint Relay can be enjoyed without major problems. If all riders and support crews follow the advice and recommendations included here, the potential for accidents can be significantly decreased.

Team Captains are responsible for knowing and understanding all content included in this bible and for educating team members on the important information. We do recommend that all participants read through the Event Bible.

This Event Bible is subject to change. Event organizers have the authority and right to change, update or adjust these rules as they see fit. After reading the Event Bible if you have any questions concerns or recommendations please contact us.

Updates

This Event Bible is subject to change. Make sure your team has the latest version of the Event Bible by checking the “Last Updated” date below.

Last Updated September 14, 2018

Special Notes:

- “Ride” not a “Race” – Remember, this is technically not a race. You must obey road regulations!
- Shadow Vehicle’s – vehicle marking, hours for shadowing
- E-bike – “pedal assist” electric bike are permitted on a case-by-case scenario
- Parking along the course – only in specific pull out areas or designated parking areas, not just anywhere along the shoulder
- No urinating or defecating on the side of the road
- Packet Pickup Hours changed for Wednesday, 9/19/18 to 4 – 7PM in Ogden

Event Information

Event Director: Clay Christensen | info@salttosaint.com | [801-234-0399](tel:801-234-0399)

Operations Manager: Cameron Scott | cameron@salttosaint.com | [662-306-0407](tel:662-306-0407)

Social Media: Communicating on Event Day – Throughout the day the Salt To Saint crew will be posting updates, photos and communicating through our social media handles. Questions and interaction are welcome. When taking & sharing photos on Instagram or Facebook please include the #salttosaint2018 hashtag. This will allow us all to view and enjoy the course from many lenses and angles.

Late Registration Deadline	8/31/2018	8 person - \$1000, 4 person - \$560, Solo - \$180
Registration fee		4.97% +1.25
Sales Tax		7.01%
Packet Pickup	9/19/18	The Bike Shoppe (4390 Washington Blvd, Ogden, UT) 4:00 pm – 7:00 pm
	9/20/2018	Start Line (2601 E. Sunnyside Ave. Salt Lake City, UT) 5:00 pm – 8:00 pm
	9/21/2018	Start Line (2601 E. Sunnyside Ave. Salt Lake City, UT) At least 1 hr before assigned start time
Start Times (To be assigned)	7:00 am to 12:00 pm every hour on the hour	
Start Times Assigned	Beginning of September	
Reflective Gear & Lights Required	7:00 pm – 7:00 am	
Shadow Vehicle allowable hrs	7:00 pm – 7:00 am	
Cut Off Time	6:30 pm September 22 nd	

Definitions

StoS – Salt to Saint Relay. The actual name of the event. Though it is called a relay, this also refers to the Solo division riders which never actually relay.

Rider – A Rider may refer to a riding entity (team or solo) or an individual on a team. Riders are those on the official roster and eligible to participate and ride towards the finish line carrying the Tracker.

Crew – Any non-riding persons in any of the team support vehicles. Riders also become “Crew” members when they are not riding the bike down the road.

Shadow – To follow directly behind the Rider with a properly equipped Shadow Vehicle; Directly behind means within 50 feet only.

Support Vehicle – Any motorized vehicle being used to support, or transport people and or equipment for Riders, their Crew members. Follow Vehicles are a specific kind of Support Vehicle.

Shadow Vehicle – A vehicle properly equipped and designated to “shadow” the Rider if the Team/Rider desires it. Shadow vehicles may not be wider than 6’6” and/or longer 20’. To use a larger vehicle to “shadow” creates unsafe riding conditions for other riders on the road.

Motorhome or Recreational Vehicle (RV) – A Support Vehicle that is larger than a 12-15 passenger van, Suburban or pickup truck. Typically they’re equipped with cooking facilities, toilet facilities, sleeping accommodations, etc. These vehicles **MAY NOT** be used as “Follow Vehicles”. There are also limitations to which transitions these are allowed.

Transition area – A designated parking area, with portable toilet, to exchange one rider for another. It is an area chosen for its parking and safety. “Follow Vehicles” are welcome at every Transition area, but there are limitations to which Transition Areas motorhomes and RV’s may enter.

EAS – Estimated Average Speed of a team as specified by the Team Captain. Calculate by taking the average speed of your team on a 20 mile ride with moderate to rolling terrain. This is done by adding the average speed of each member of your team together and dividing by the total number on your team.

Impeding Traffic – Driving a support vehicle at such a slow speed that it could delay, prevent, obstruct, hinder, or block the normal and reasonable movement of traffic.

Leapfrog – A technique used by which support vehicles send a rider off, and then drive ahead to the next transition in order to prepare the next Rider for their leg.

Night Riding/Conditions – Night riding shall be considered from 7:00 pm LOCAL time until 7:00 am LOCAL time, OR any time when vehicles would normally have their night driving headlights on, OR any time visibility is less than 1000 feet (300m). If you have any doubt about the visibility conditions, operate as if it is night riding. Shadowing a rider is permitted only during these hours. Shadow Vehicles must be properly equipped and marked to shadow a rider.

Bike Path – A non-motorized vehicle paved path.

Road Shoulder – The area of paved road to the right of the yellow line.

Thin Shoulder – Area with little to no rideable pavement to the right on the yellow line.

Event/Course Official – An StoS staff person designated to help riders and enforce any of these Rules.

Course/Route – The Official Event Route as designated in the StoS maps.

Transition Area – The designated parking area where the Support Vehicles and Teams are able to park and wait for the incoming rider.

Rolling Exchange – A Rider Exchange where the new Rider starts riding while the incoming Rider is approaching the Transition area; ***this is not allowed.

Course Maps – The Official StoS Maps which details the Course with instructions and maps.

Stationary Exchange – A Rider Exchange where the incoming Rider stops, the tracker is handed off, and the new Rider starts.

Open Division – Team with a number of riders different than the standard team sizes.

Ride Time – The running time starting from 7:00 am Friday morning.

Start Time – Time assigned to each team specifying the time they start riding.

Time Allowance – The allotted time given to each team to finish.

Cut Off – 6:30 pm, the designated at which the finish line will be pulled down, and participants will no longer be considered event participants or finishers. **If you are worried about finishing in the allotted time, please consult with the Event Director for possible consideration.**

Transition Window – The window of time Transition Areas will be open.

Winners – Every team that finishes this great adventure. Remember, this is a “Ride” not a “Race”.

Whiners – The team mate that no one wants in the car... To cold, to hot, hungry, I can't feel my legs, "my bike fell off back there"... just don't be that person!

Team Breakdown

Divisions are made up of:

- Rider Category
- Gender

Rider Categories

- 8-Rider –eight riders sharing the entire distance
- 4-Rider–four riders sharing the entire distance
- Solo – one rider riding the entire distance
- Open – teams of all other sizes

Gender Categories

- Men
- Women
- Mixed - indicates that there is at least one male and one female member.

What's In It For You

In addition to the experience of a lifetime riding, this beautiful route and partying all night with some of your crazy friends, you will also receive:

- A well-marked course (signage telling riders where to turn)
- Live GPS tracking
- Excellent driving directions for your support vehicle
- Cool finisher medals for all those who complete the ride
- A good looking T-Shirt
- Team bag with goodies from sponsors
- Vehicle Markings
- Well-planned, safe transition areas
- Port-a-potties or other restrooms along the route
- Accurate timing
- Salt To Saint Relay window decals for every rider
- Great finish line atmosphere including music, drinks and other goodies
- Killer schwag drawings all day
- And more... Oh so much more!

Registration

Team Captains **do not** need to register their entire team at the same time. They are responsible to register themselves, pay for the team, and choose their team name. Once the Team Captain registers he/she can share the Team Name with teammates who will select to add themselves to that team. The team captain has the ability to go back and edit the info as needed. See the “Dates, Times & Info” section for registration deadlines.

Categories

1. 8 Person Team

This is the most popular category. Divided into 24 legs, each rider can ride 3 legs averaging 17.5 miles per leg and average about 53 miles per person. This division will include riders with a variety of skills from beginning riders to accomplished racers.

2. 4 Person Team

This category holds the course record of 17 hrs 45 minutes (set by the Simply Mac Racing Team in 2012). Generally speaking this is the category that competitive cyclists choose. Riders may exchange at every transition or go for multiple legs to spend more time on the bike.

3. Solo

The category title is pretty self explanatory. Solo means one Rider from the start line to the finish line. You are welcome to work with other riders on the road and to eat or sleep whenever and wherever you want.

Solo Riders generally will start at 7:00 am and have 36.5 hrs to complete the ride.

a. Specific Requirements

- All solo riders must have a support crew of at least **2 people**. No one person should be responsible for driving the entire distance. It is unsafe and unwise.
- Riders must know and understand night time riding rules. Especially the reflective gear and lighting rules. This will take extra work as you will need to make sure your team keeps your batteries charged and keep you visible with reflective gear. (See night time riding rules)

b. Recommendations

- Ultra-distance cycling is a mental game. Make sure you have ways to keep your mind active and alert while riding.
- We recommend that support vehicles stay behind riders during night time riding hours. This does not have to be directly behind the rider, though this is not a bad idea, but staying behind on the course will ensure your rider has help if there are mechanical problems and no cell service.
- Take a cell phone with you. Though cell phone service comes and goes along the course, there is more coverage than dead spots. This will help in case you get lost along the course, or need more clothing or new batteries.

4. Open

If you would like to create a team consisting of a different number of riders than listed above, it is an option. However, this must be approved by the event committee prior to registration. Please contact us via info@salttosaint.com to explain what team size you would like to have and an explanation of why.

Packet Pickup

1. Check in

Teams can pick up event packets from the one of two locations on one of three days: 9/19/18, 9/20/18, or 9/21/18:

9/19/18 – A team representative may check in between 4:00 pm -7:00 pm at The Bike Shoppe in Ogden, UT.

9/20/18 – A team representative may check in between 5:00 pm – 8:00 pm at the Start Line area.

9/21/18 – A team representative must check in **no later than 1 hr prior** to your team's assigned start time. Feel free to show up early and watch the other Riders take off.

A. Where

Hogle Zoo overflow parking lot. It is the lot directly across the street (north) from Hogle Zoo (2601 E Sunnyside Ave. Salt Lake City, UT 84108)

B. Who needs to be there

One representative from your team may check your team in, but we **recommend sending two**. It is hard to carry all the required items. See the list below to make sure the team representative brings everything they need. If only one representative checks the team in, they are required to sign their name for the team and take responsibility for the team receiving all information they have been given at the start line.

C. What you will need to check in

This is a list of items that will be required at check in. Please make sure you bring all of them so your team can be cleared to ride:

1. **Two bike headlights.** By law, lights must be visible from 500 ft. We recommend you **use a light you can see well with, not just a light that can be seen**. As a rule of thumb, if you have to ride slower at night than in the day (meaning you can't see what's in front of you very well) your light is not bright enough.
2. **Two flashing red taillights.** Must be visible from 500 ft. Taillights should have a strobe setting to help you be more visible.
3. At least **two reflective vests or jackets** – we recommend that every person that plans on getting out of the vehicle at night wears reflective clothing.
4. **Two cell phone** numbers that may be used to contact your team. Preferably different carriers as to increase the chance of one or the other being in service.
5. **Copy of the Event Bible**

General Points

- Each team that participates in the Salt To Saint Relay will be assigned a Satellite Tracking unit. It will be carried in a jersey pocket or on a provided arm band.
- The flexibility of the Salt To Saint format is designed to add to the fun. We do not tell you that rider 1 must ride legs X, Y, and Z. We give you recommendations of course, but if you think you have a better strategy... use it! You can transition at every transition area or every other transition. This is where your brain comes in. You will have to decide which rider will ride what leg(s).
- Teams will be assigned a start time of 7 am, 8 am, 9 am, 10 am 11 am, or 12 pm, according to their EAS (estimated average speed). To calculate your team's EAS, take the average speed of your team on a 20 mile ride with moderate-to-rolling terrain. This is done by adding the average speed of each member of your team together and dividing by the total number on your team.
- It is very important that you estimate this as closely as possible and do not manipulate it to attempt to be assigned a certain start time. These times are assigned for reasons of safety and flow. Manipulating them can make it so you arrive at transitions and the finish line before anyone arrives or after they have closed up.
- Due to road construction and other unforeseen problems along the course, the route is likely to change slightly from year to year. Generally it will be between 400 and 430 miles. That being said, don't hold us to the mile. We promise that it will not be 500 miles or 350 mile. Sound good?

Rules

These rules are designed and enforced for three primary reasons: 1) Safety; 2) To create a fun, memorable atmosphere; 3) To ensure the cooperation and permission of all City, Town, State and other government agencies. They come from our experience as well as other well established cycling events. They are intended to minimize hazardous situations. Yes, accidents do happen, but if teams and riders follow these rules as well as use good common sense, the likelihood of accidents is diminished. While these rules are here to ensure safety, fairness, and a fun time, ultimately the responsibility for all of these things remains with the Riders and their teams. If a team disregards or breaks any of the following rules, we reserve the right to take your number and Satellite Tracking device and you will be asked to abandon your goal.

Safety is essential for everyone involved. Riders, Support Crew, and Staff must all do their part to make the Salt To Saint Relay safe and successful. Please pay attention to safety at all times.

1. Emergencies

If the police or ambulance are needed call 911 immediately. Then, contact the Event Director as soon as possible.

2. Event Director's Rules Prerogative

The Event Director reserves the right to clarify the "intent of the rules" to preserve the integrity of the event. The Event Director may construct new rules and penalties, or alter old rules and penalties if necessary, before, during or after the event under circumstances that were not foreseen by any of the following rules, or if a Rider is trying to find "loopholes" in the rules. The interpretation and enforcement of any rule will be primarily governed by these principles:

- Safety is always followed.
- Any action of a Rider or Crew which results in either an unfair advantage to the Rider or an unfair disadvantage to another Rider will result in a penalty.
- The integrity of the event

Full responsibility for any rule decision and any penalty will be borne by the Event Director.

3. Contingencies

While we have worked hard to minimize "contingencies", when riding over 400 miles across an entire state of Utah, there is a chance you will experience "unplanned events" such as traffic light malfunctions, traffic jams, trains, winds, storms and other "acts of God," road construction and other similar occurrences of "unplanned events" over which the event organization had no control. It is possible one Rider may be stopped for road construction while another is not. It is possible that one Rider has to follow a longer line of cars than another or that one Rider will be stopped at a red light while another is not. These inconveniences are all part of your experience and part of the challenge of the Salt To Saint Relay.

Teams must notify the Event Director if the route becomes impassible due to serious accidents, flooding, fire, natural disasters or some other reason.

4. Support Vehicles

Support Vehicles – Support vehicles may take many sizes or shapes. As long as they are road legal safe, they can act as a general support vehicle. Where there are more regulations are for the Shadow Vehicles.

Shadow Vehicle - We have worked very hard with UDOT and UHP to make this ride safe and not cause problems with regular traffic. One of the most important ways to do this is by following the Shadow Vehicle rules.

- Shadow Vehicle are **only allowed during night time hours** of 7:00 pm to 7:00 am.
- **Shadow Vehicles must have two roof-mounted amber flashing lights**, one at each far left and right end of the roof rack or roof, visible only from behind - not from the front. Tape is usually used to cover the front half of the light. They may be battery powered or powered by the vehicle electrical system, but they must not interfere with the vehicle's factory emergency flashers, turn signals, taillights or brake lights.

If the lights are too dim, modify or replace accordingly by adding higher intensity bulbs if possible or replace units so they can be seen during the day. If they are too bright, cover part of the light lens with filament tape (packing tape with the strands) or other suitable translucent material until the glare is eliminated. If the roof-mounted amber flashing lights are battery powered, the Support Crew must carry spare batteries.

The roof-mounted amber flashing lights must be bright enough to be seen during the day; however, they must not be so bright as to interfere with other driver's vision. Amber lights must be on and working at all times when Shadowing a Rider.

- Shadow vehicles may not be wider than 6'6" and/or longer 20'. To use a larger vehicle to "Shadow" creates unsafe riding conditions for other riders on the road and absolutely must not be done.
- Shadow Vehicles **must have a federal DOT standard reflective Slow Moving Vehicle Triangle**. These are orange equilateral triangles with 12-inch sides and 1.5 inch reflective red borders. The triangles must be displayed on the rear of the Follow Vehicle while following directly behind the Racer. This DOT triangle must be visible to drivers approaching from the rear. The triangle must be removed or covered when traveling at normal highway speeds. However, the triangle may be left in place during Leapfrog Support. Bike racks mounted to the rear bumper of Support Vehicles must not obstruct the required Support Vehicle signage, including Caution Bicycles Ahead, Racer Number and Slow Moving Vehicle Triangle.

Transition Access Limitation - There are a number of Transitions that have vehicle size limitations to be aware of. Vehicles larger than 6'6" wide and or 20' long are not allowed to pull into these transition areas directly (see Transitions section for breakdown). If your team is using a vehicle larger than the above stated dimensions, you will need a second vehicle to act as the "Shadow Vehicle" and to access some of the transitions. If you plan to "Shadow" your rider at any time during the event, this can only be done with a vehicle that meets the size limits of a "Shadow Vehicle" and is equipped properly. Yes, this can be a pain, but it's a safety thing. Remember, this limitation is only for vehicles larger than larger than 6'6" wide and or 20' long.

Required:

- Each Team will be given two adhesive signs displaying their team number. At least one of these signs must be visible on the rear or side windows of each support vehicle.
- Each Team will be given two "Caution Bicycles Ahead" signs. Two are to be placed in visible locations on the rear of each support vehicle.

Recommended:

- We recommend you also display your Team name and number on the other two sides of the vehicles. It took a lot of thought to think that puppy up!
- Decorate your vehicles. We encourage drawings on the windows, inspirational speeches, a tally of the number of people you pass, etc.
- Do whatever it takes to win the best decorated support vehicle competition!

5. Riders

- Riders are required to follow **all road regulations without exception.**
- The rider assigned to the leg at hand (the rider progressing down the course) is required to carry the satellite tracker
- **Follow road regulations! If you do not you will be disqualified!**
- At least one rider from your team must be on the road if there is forward progression from your team on the course.
- Did we say follow road regulations? There will be **no** closed intersections, road closures or traffic directing of any kind. If there is a stop sign... Stop! Hopefully you're catching the point. Local police have the ability to ticket any cyclist that is not following road regulations, and have informed us they will be watching. *If any of our participants are cited for breaking road regulations their entire team will be automatically disqualified, and they will be publicly shamed.* We say this because issues we have with participants not following road regulations can make it so the event will not receive the required permits in the future.
- If a rider becomes lost or travels in the wrong direction, they must **return** to the point on the course where they went wrong and start from there. You may get in the car to get back to that point but do not jump in the car and catch back up to where you would have been if you had not gone off course. The satellite tracker is watching!
- All cyclists must ride non-motorized bicycles. This includes tandems, hand cycles, unicycles, fixed-gear bikes, recumbent and any other self-propelled cycle.
- Do not take items from a moving vehicle. This is not the Tour de France, and much as you may feel OK with this it cannot be done during this event.
- Support vehicles cannot assist riders in forward progression. No holding onto mirrors or pushing riders up the hills.
- Riders must wear a helmet whenever on a bicycle!
- Teams may have more than one rider on the road at a time if so desired. We recommend you send two riders out at a time during night time hours to increase their visibility.
- No naked riding, riding in the buff, wearing your birthday suit, going "au naturale" (need we say more?).
- No interfering with other riders or teams.
- Ride single file unless passing.

A. Bicycle Marking

- Each Rider will receive a number plate to be attached in a visible location on the rear of the bicycle; e.g., back of seatpost, or top of seat stay.
- Bicycles that are used at night must be visible from all directions.

B. Night Time Riding

- Night time riding hours are **7:00 pm to 7:00 am.**
- Riders must be visible from all directions during night time hours. That means headlight, taillight and then reflective material on right and left sides. We recommend reflective tape on your bike in addition to the required reflective clothing.
- All cyclists riding at night must have at least one headlight and one red flashing tail light. We recommend riders have two headlights while riding (one as a backup if batteries in your primary light fail). If you are seen riding without a light **you will be disqualified.** Officials reserve the right to remove your numbers and satellite tracking device and ask you to leave the course. Just don't do it! It is not safe!

6. Transitioning

- **Riders must come to a complete stop before handing Satellite Tracker off to the next rider.**
- Riders must transition off of the road. Do not stop in the road; it is dangerous.
- Support Vehicles wishing to stop to cheer their riders on, or to transition to a new rider must pull off the road only where there is a legal parking area. Pulling into the dirt on a road shoulder is not permitted. You must only park in legal parking areas. Violations may result in disqualification.
- Once a rider has stopped in the transition area, the team can help him/her transfer the Satellite Tracker to the next rider.
- If support vehicles must stop, they must be pulled out of the way of cyclist and other road traffic. But again, this cannot be in dirt shoulders; they have to be legal parking locations.
- Many of the transitions take place in small towns. Please be courteous to the residents by keeping the noise to a minimum during night-time hours.

7. Support Vehicles (SV)

- SV must be roadworthy and legal.
- No persons should ride in any illegal fashion, such as in camp trailers, trunks, roof racks or other unwise/unsafe places.
- SV cannot hand items to a moving cyclist. Did we mention this is not the Tour de France?
- SV cannot interfere, block, heckle or bother cyclists from other teams.
- SV must pull completely off the road, all four tires, in transition areas to ensure safety of the support crew and cyclist.
- When pulling off the road for any reason, do so only in legal parking areas. The SV must pull completely off even if it is stopping "just for a second".
- Provided signs must be posted in a visible position on the back of the SV.

Safety! Safety! Safety!

Safety is the most important thing of all. Road cycling can be a dangerous sport. There are dangers like rumble strips, pot holes and other road damage to be aware of, and then there are those large motorized things to deal with. Throw in night time and over 400 miles, and the potential for an accident is definitely there. That being said, if we work together, follow the rules, putting safety first and using our best judgment, we can minimize the risk, have a blast and accomplish something great.

It is important to remember that participants must follow all road regulations. Doing so will decrease the probability of accidents.

“The Law”

Course officials, “The Law”, will be driving the course, during event hours, looking for rule violators and/or safety hazards. They have the authority to disqualify any team, assess time penalties or any other consequence they see fit. They are there to help keep the event safe. Please treat them with respect and inform them if you see any problems.

We have tried to leave much of the ride format up to the teams, but for safety purposes, we do require that you follow certain guidelines to ensure the safety of all participants. Be sure to know and understand the safety section in its entirety, to ensure there are no problems, disqualifications or accidents. **The Law will be watching.**

Post Ride

Contests

Best Video

You could go for power, beauty, comedy or drama...up to you. You can incorporate still shots or video, but the final product must be in edited into video format for posting to YouTube.

Now let your imaginations flow and see if you are good enough to win a free team entry to the 2019 Salt To Saint Relay. Submissions deadline is Monday, October 8th. There will be one week of voting. You may recruit votes up until midnight on October 15th. The winner will be announced the week of the 15th.

Best Vehicle

We challenge you to decorate! Let the world know what you are doing. Take a picture of your vehicle(s). Post it on our Facebook page (<https://www.facebook.com/salttosaint>). The team that gets the most likes will be given a really cool prize that has yet to be determined. Most likely something your team cannot live without.

Best Picture

Bring along your cameras! Not only will it provide great memories to stroll with, but if your picture is chosen as the “Best Picture” it will be used in our marketing and you get some really cool compensation. A hard copy needs to be submitted to info@salttosaint.com. Photos will be posted on Facebook and voted on. More details will be sent out after the event.

On-Course Markings

Examples of the on-course markings will be displayed at the start line. Make sure to be familiar with them.

Basic Leg Description:

These leg descriptions are designed to help you get a better idea of what each leg holds for you. This list is a basic overview and does not necessarily cover all road conditions or situations you may encounter on a given leg. It would be a great thing for riders know before riding the leg they are responsible for.

Here are a few things it will cover:

1. Type of riding definitions:
 - City riding - stop lights, intersections, stop signs, possible motor vehicle traffic & parked cars
 - Neighborhood riding - frequent intersections, slower traffic, parked cars, speed bumps & pedestrians
 - Highway riding - rumble strips, potentially narrow shoulders, higher speed traffic & fewer course markings
 - Pathway riding - potential driveway and street crossings, dogs, pedestrians, slow cyclists & pavement cracks
2. Restroom locations
3. Gas locations
4. Road condition: Excellent, Good, Fair, Poor
5. Transition Parking

Start Line: Hogle Zoo Overflow Parking Lot

Start line Parking: Hogle Zoo Overflow Parking Lot (North across the street from the zoo)

Restrooms: There will be portable toilets at the start line

Check-In Location: Hogle Zoo Overflow Parking Lot (North across the street from the zoo)

Leg 1: Start to Draper

Distance: 22.9 Miles

Riding conditions: Leg 1 is city, pathway, and highway riding

Restrooms: There will be portable toilets at the start line and Transition 1

Gas: Fill up prior to starting

Road Condition: Excellent

T1 parking: Andy Ballard Arena

Leg 2: Draper to Saratoga Springs

Distance: 14.2 Miles

T1 Parking: Andy Ballard Arena

Riding conditions: Leg 2 is city and highway riding

Restrooms: T1 and T2

Gas: Plenty of options in Saratoga Springs

Road Condition: Good, be award of one-way bridge after you cross under I-15

T2 parking: Smiths Market Place parking lot (689 N Redwood Rd)

Leg 3: Saratoga Springs to West Side of Utah Lake

Distance: 13.5 Miles

Riding conditions: City, construction and highway riding

Restrooms: T2 and T3
